

CNA Prometric Test 2

- 1. A nurse aide enters a room just as a resident's wife slaps the resident. The resident does not seem upset or hurt. What should the nurse aide do?**
 - A. Leave the room and close the door to allow privacy.
 - B. Consider if this is normal behavior for this couple.
 - C. Report the observation to the charge nurse immediately.
 - D. Tell the wife that she must leave the facility for the day.

- 2. Which of the following is an example of disinfection?**
 - A. Washing a resident's hands after toileting.
 - B. Using a wipe to clean around a resident's stoma.
 - C. Cleaning a shower chair with a chemical cleaner.
 - D. Cleaning a resident's bath basin with soap after use.

- 3. A nurse aide is assisting a resident at mealtime. The resident grabs his throat and cannot speak. What should the nurse aide do first?**
 - A. Try to get the resident to take a few sips of water through a straw.
 - B. Reach around from behind the resident to provide abdominal thrusts.
 - C. Pat the resident's back and then reach in his mouth to remove the blockage.
 - D. Ask the resident to take a deep breath and cough.

- 4. According to Standard Precautions, the nurse aide should wear gloves for which of the following procedures?**
 - A. Getting linen from a linen cart.
 - B. Removing soiled linen from a bed.
 - C. Performing range of motion exercises.
 - D. Transferring a resident to a showerchair.

- 5. The term vital signs refers to.**
 - A. Any important information about a resident's condition.
 - B. The color, condition, and appearance of the skin.
 - C. Fluid intake and output, as well as bowel movements.
 - D. Temperature, pulse, and respirations.

- 6. Why should residents who are unable to change their own positions, have their positions changed by staff at least every two hours?**
 - A. Correct resident's posture.
 - B. Improve the residents' breathing.
 - C. Promote circulation at pressure points.
 - D. Provide an opportunity for incontinent care.

- 7. When providing foot care, the nurse aide observes an open sore on the resident's foot. The nurse aide should.**
 - A. Pat gently to dry dressing before applying a sock.

- B. Stop the foot care immediately and ask the resident what happened.
 - C. Report the skin opening to the charge nurse as soon as possible.
 - D. Check the resident's sock for any wound drainage.
- 8. A resident who is in isolation needs a temperature taken several times a day. Where is the appropriate place for the thermometer to be kept?**
- A. At the nurses' station.
 - B. On the isolation cart outside the resident's room.
 - C. In the dirty utility room.
 - D. In the resident's room.
- 9. When counting a resident's pulse, the nurse aide should.**
- A. Notice if the rhythm of the heartbeat is regular.
 - B. Ask if the resident takes any heart medication.
 - C. Consider the time of day when the pulse is taken.
 - D. Multiply the rate by four if counted for 30 seconds.
- 10. A nurse aide is walking a resident using a gait belt. The resident tells the nurse aide she feels dizzy. The nurse aide should.**
- A. Hold the gait belt tighter and ask the resident to rest for a minute.
 - B. Suggest the resident lean on the nurse aide for more support.
 - C. Guide the resident over to the handrail and ask to hold.
 - D. Ease the resident to the floor if a chair is not available.
- 11. While bathing a resident who is comatose, the nurse aide notices a reddened area on the left hip. Once reported, the charge nurse is likely to request that the nurse aide.**
- A. Massage the area using lotion.
 - B. Apply a dry protective dressing over the area.
 - C. Keep the resident positioned to avoid pressure on the hip.
 - D. Cleanse the hip using extra soap, then rinse and dry thoroughly.
- 12. The care plan requires that the resident be ambulated 100 feet twice a day at 10 a.m. and 2 p.m. When the nurse aide arrives to walk the resident at 10 a.m., the resident refuses. Which of the following is the best response by the nurse aide?**
- A. "Maybe you can plan to walk a little further this afternoon."
 - B. "The doctor ordered your walking exercise. You really need to try."
 - C. "You have the right to refuse. Do you want me to tell the nurse?"
 - D. "Would you prefer to walk a little later?"
- 13. A resident is choking. The first response by the nurse aide should be to.**
- A. Go find the charge nurse.
 - B. Get the suction machine.
 - C. Call emergency services (911).
 - D. Begin abdominal thrusts.
