Status

Student Response	Model Answer	Explanation	Points Earn
exhibits	exhibits	"Exhibits" is the correct answer because Eric's diagnosis is occurring in the present, not hypothetically.	0.5 out of 0.5

Diagnosis

Student Response	Model Answer	Explanation	Points Earn
impaired resilience	impaired resilience	While Eric does display self-neglect through his reported lack of bathing and work attendance, and while Eric's sleep has been disturbed as of late, both of these diagnoses stem from Eric's trouble coping with his hallucinations, pointing to an "impaired resilience" diagnosis.	0.5 out of 0.5

Etiologies

Student Response	Model Answer	Explanation	Points Earn
auditory hallucinations	auditory hallucinations	The distress Eric is experiencing is caused by his auditory hallucinations, and his inability to afford his previously effective schizophrenia medication.	0.5 out of 0.5

Support

medication noncompliance	medication noncompliance	The distress Eric is experiencing is caused by his auditory hallucinations, and his inability to afford his previously effective schizophrenia medication.	0.5 out of 0.5
--------------------------	--------------------------	--	----------------

Signs & Symptoms

Student Response	Model Answer	Explanation	Points Earn
Resilience: difficulty discerning reality from fantasy	Resilience: difficulty discerning reality from fantasy	Because impaired resilience is the most appropriate diagnosis for Eric, the relevant symptoms are those that indicate a difficulty coping with distress. Eric reports distress and a difficulty with recognizing his hallucinations and paranoid thoughts as unreal; he also expresses a remote fear of giving into his suicidal command hallucinations.	0.5 out of 0.5
Resilience: distress caused by hallucinations	Resilience: distress caused by hallucinations	Because impaired resilience is the most appropriate diagnosis for Eric, the relevant symptoms are those that indicate a difficulty coping with distress. Eric reports distress and a difficulty with recognizing his hallucinations and paranoid thoughts as unreal; he also expresses a remote fear of giving into his suicidal command hallucinations.	0.5 out of 0.5
Resilience: fear of giving into suicidal command hallucinations	Resilience: fear of giving into suicidal command hallucinations	Because impaired resilience is the most appropriate diagnosis for Eric, the relevant symptoms are those that indicate a difficulty coping with distress. Eric reports distress and a difficulty with recognizing his hallucinations and paranoid thoughts as unreal; he also expresses a remote fear of giving into his suicidal command hallucinations.	0.5 out of 0.5
Resilience: paranoid thoughts	Resilience: paranoid thoughts	Because impaired resilience is the most appropriate diagnosis for Eric, the relevant symptoms are those that indicate a difficulty coping with distress. Eric reports distress and a difficulty with recognizing his hallucinations and paranoid thoughts as unreal; he also expresses a remote fear of giving into his suicidal command hallucinations.	0.5 out of 0.5

Self Assessment

Your answer is not automatically evaluated by the simulation, but may be reviewed by your instructor.
