# HESI EXIT LPN

## V1 - 2023

1 of 110

Which action by a practical nurse (PN) indicates the best understanding of the principles related to medical asepsis and effective handwashing?

- ☐ A Turn the water volume to a low level to decrease splashing.
- ☐ B Dry the hands above the wrists first to dry them clean to dirty.
- ☐ C Use antibacterial hand gel instead of handwashing between clients.
- ☒ D Hold the hands lower than the elbows to promote microbe removal.

*(A large red 'D' is handwritten on the right side of the screen.)*

2 of 110

The mother of a young child with eczema asks about the type of clothing that is best for her child's comfort. Which choice should the practical nurse (PN) recommend?

- ☐ A Rayon.
- ☐ B Silk.
- ☐ C Polyester.
- ☒ D Cotton.

*(A yellow highlight is under option D. A watermark 'NursingHeroPN@gmail.com' is visible diagonally across the screen.)*

3 of 110

A male client with polycythemia vera is scheduled for phlebotomy in the unit's procedure room. What action should the practical nurse implement when coordinating departmental services for this procedure?

- ☐ A Notify the blood bank about the scheduled phlebotomy procedure.
- ☒ B Schedule the treatment with the Special Procedures department.
- ☐ C Ensure that chest x-ray and other radiological reports are available.
- ☐ D Ask pharmacy to deliver an additional PRN dose of an analgesic.

*(A large yellow 'B' is handwritten on the right side of the screen. A red barred area is visible at the top right.)*

4 of 110

A 15-year-old male who is mildly mentally disabled is admitted to the adolescent unit because he repeatedly refuses to complete personal hygiene. The healthcare provider prescribes that the client brush his teeth three times a day. In the psychiatric team conference, a behavior modification program is recommended to engage the client's participation. When implementing this technique, which reinforcement is **best** for the practical nurse (PN) to provide?

- ☐ A Candy for each successful hygiene task, like brushing his teeth.
- ☒ B Preferred activities or tokens for each compliance.
- ☐ C Privilege restriction or fines for refusals to complete a hygienic task.
- ☐ D Unit tasks for each omission of teeth brushing.

*(A yellow highlight is under option B. A large yellow 'B' is handwritten on the right side of the screen.)*
