
HESI EXIT RN 2023

V1

nursinghero.rn@gmail.com

A mother runs into the emergency department with a toddler in her arms and tells the nurse that her child got into some of the child's clothes. After ensuring the airway is patent, what action should the nurse implement **first**?

- ☐ A Assess child for altered sensorium.
- ☒ B Determine type of chemical exposure.
- ☐ C Obtain equipment for gastric lavage.
- ☐ D Call poison control emergency number.

Which conditions are most likely to respond to treatment with antihistamines? (Select all that apply.)

- ☐ A Bronchitis.
- ☒ B Allergic rhinitis.
- ☐ C Otitis media.
- ☒ D Contact dermatitis.
- ☐ E Myocarditis.
