<p><b>CC: 25 y/o F</b></p> <p><i>“I have this ugly looking rash on my upper thighs”</i></p>	<p><b>HPI:</b> Ms. Hampton is a 25 y/o female presenting with an itchy and tender rash bilaterally on her inner thighs, and her left inner forearm. The rash started about 36 hours ago after hiking in Napa with her boyfriend. She states she spent time hiking, tried a new sunscreen, tried new foods such as scallops and a new drink, as well as spending time in the hot tub with her boyfriend. She reports that her boyfriend does not have similar symptoms, and that she has not tried any treatments for the rash.</p>
<p><b>PMHx:</b></p>	<p><b>SurgHx</b></p>
